

Start Your Journey to Responsible Chemical Management

eurofins

Chem-MAP

Chemical Management Systems for the Entire Supply Chain

Eurofins | Chem-MAP® is a Suite of Chemical Management and Verification Systems for the Entire Supply Chain

Chem-MAP® is a **ZDHC approved** programme focused on the implementation of robust chemical management systems in the **leather, textile** and **synthetic materials** supply chains. This multi-module programme is fully aligned with ZDHC objectives and offers ZDHC Conformance Level 1, 2 and 3. Chem-MAP® supports businesses with MRSL and RSL management, actively reducing chemical risk within their supply chain.

Developed by Eurofins | BLC, Chem-MAP® prevents harmful chemicals from entering the materials supply chains, thereby protecting workers, consumers and the environment.

Chemical companies, materials manufacturers, brands and retailers achieve an internationally recognised award through one of three programmes in the Chem-MAP® family. Achieving a Chem-MAP® award signifies the use of responsible chemicals in the production of consumer goods.

Eurofins | Chem-MAP® is the future of chemical management in leather, textile and synthetic materials supply chains.

Eurofins | Chem-MAP® chemical management programmes have a structured approach and are tailored to your business needs. They effectively help you manage chemical inputs across leather, textile and synthetic materials.

Chemical Manufacturers and Suppliers

Benefit from becoming Chem-MAP® certified through the Chem-MAP® Programme, gaining ZDHC V2.0 Conformance Level 1 to 3 and verification of chemical formulations to the ZDHC MRSL, enabling them to be listed on the Gateway.

Manufacturers of Materials and Products

Reduce RSL failures and gain Chem-MAP® Approved Manufacturer status for your facility and Chem-MAP® Approved Technician awards for your staff with Chem-MAP® for manufacturers of leather, textile and synthetic materials.

Brand and Retailer Chemical Management

Implement a robust chemical management system in your materials supply chain and build responsible chemical sourcing strategies with Chem-MAP®, benchmark your systems with industry leaders and reduce RSL failures.

Testing of Chemicals to a Range of MRSLs

Minimise RSL failures with MRSL testing to the ZDHC or other industry/brand MRSL, further reducing chemical risk to your customers and the supply chain, as well as providing a long-term financial benefit for your business.

Vegan Certification of Chemicals for Use in Materials

DNA analysis of chemicals used in the manufacture of materials to establish whether any animal products or by-products have been used. This enables brands and manufacturers to achieve vegan verification through Chem-MAP® Certification.

Our team of experts have developed standalone testing and verification services for chemical inputs, providing your business with certified assurance of chemical contents to specifications.

Achieve ZDHC V2.0 Conformance Level 1, 2 and 3 Through the Eurofins | Chem-MAP® Programme

Chemical companies around the world will benefit from becoming certified through the Chem-MAP® Programme. Completion of the programme enables chemical manufacturers to gain ZDHC Conformance Level 1 to 3, providing verification of chemical formulations to the ZDHC MRSL. Thereby, demonstrating their commitment to responsible upstream chemical management.

Chem-MAP® for Chemical Companies Programme Modules

Module 1:
On-Site Chemical
Management Audit

Module 2:
MRSL Testing

Module 3:
Chemical Supply Chain
Transparency

Benefits of Chem-MAP® for Chemical Manufacturers

- ZDHC Conformance Level 1, 2 and 3
- ZDHC compliant chemical formulations listed on the ZDHC Gateway updated to show certification of ZDHC Conformance Level 1, 2 and 3
- Assurance of chemical supply chain transparency through on-site audits and MRSL testing (ZDHC Conformance Level 3 only)
- Recognition of the chemical company's commitment to responsible chemistry

Become a Eurofins | Chem-MAP® Approved Manufacturer

Manufacturers of leather, textile and synthetic materials can achieve Chem-MAP® Approved Manufacturer status for the implementation of responsible chemical management in the supply chain. Chem-MAP® equips manufacturers with a range of capacity building tools including online training programmes, chemical inventory management and chemical management audits of manufacturing facilities.

Chem-MAP® for Manufacturers Programme Modules

Module 1:
On-Site Chemical
Management Audit

Module 2:
Chem-MAP® Approved
Technician (CAT)
Award

Benefits of Chem-MAP® for Manufacturers of Products and Materials

- A chemical management audit of the manufacturing site(s)
- Becoming a Chem-MAP® Approved Manufacturer (CAM)
- Staff achieving the Level 1/Level 2 Chem-MAP® Approved Technician (CAT) award through access to expert chemical management training online

Developing Chemical Management Systems for Brands and Retailers

Chem-MAP® can support brands and retailers with implementing responsible chemical management in their materials supply chains for leather, textile and synthetic products. Chem-MAP® provides a flexible approach to capacity building and ultimately positions brands and retailers to implement responsible chemical sourcing strategies within their material supply chains.

Chem-MAP® for Brands and Retailers Programme Modules

Module 1:
Chemical
Management Audit

Module 2:
Benchmarking and
Gap Analysis

Benefits of Chem-MAP® for Brands and Retailers

- An independent technical review of current chemical management systems
- Help with developing a responsible chemical management programme and implementing this in the materials supply chain
- Benchmarking and gap analysis against industry leaders
- An action plan for improvement
- Support to help brands and retailers satisfy ZDHC goals and objectives

MRSL Testing: Testing Upstream to Reduce RSL Failures in Manufacturing

Manufacturing Restricted Substances List (MRSL) testing is an essential component of chemical risk management, focusing upstream in the supply chain, beyond Restricted Substance Lists (RSL) testing. MRSL testing through Chem-MAP® can help to minimise RSL failures, providing a long-term financial benefit for your business and further reducing chemical risk to your customers, and the rest of the supply chain.

MRSL Testing Packages

Package 1:
Complete MRSL Testing of
Chemical Formulations

Package 2:
Smart Testing of Chemical
Formulations

Package 3:
MRSL Testing of Individual
Analytes or Chemical Groups

Package 4:
MRSL Testing to Customer
Specifications

Ensure your products meet a recognised industry standard

Laboratory specialists at Eurofins I BLC have developed the testing of chemicals to an MRSL which includes a series of fully validated test methods, that are used in Eurofins | Chem-MAP®. The test methods are then used to determine the quantity of individual chemicals within a supplied chemical formulation, against those listed on the **Zero Discharge of Hazardous Chemicals (ZDHC) MRSL**.

Eurofins | Chem-MAP® Vegan Verification Testing

A new innovative programme within the Chem-MAP® family which risk assesses materials and components, as well as providing testing of chemicals and materials, to establish whether any animal products or by-products have been used.

Vegan Verification helps manufacturers, brands and retailers to correctly specify materials using a phased approach, covering the manufacture of materials, chemical management, risk assessment and testing to achieve vegan verification of materials.

Vegan Verification Services Offered

Strategy Support

Policy Creation

Bill of Materials (BOM)

Chemical Inventory Log (CIL) Creation & Review

Risk Assessment of BOM & CIL

Onsite Audits

DNA Analysis of Chemicals for Animal DNA

Microscopy for Animal Fibres

FTIR Testing for the presence of animal proteins

Declarations of Conformity

Referrals to the Vegan Society

Eurofins | Chem-MAP® Vegan Verification Testing

The Vegan Society

The Vegan Verification Testing programme has been registered with The Vegan Society's Vegan Trademark.

The Vegan Society registered verification test will give manufacturers, brands, retailers, and consumers the reassurance that vegan product claims have been validated, and the materials used to develop the product have no trace of animal derivatives.

The Vegan Trademark will be awarded to those companies who successfully meet verification criteria for all product components.

Benefits of Chem-MAP® Vegan Verification

- Assurance that any chemistry used in the production of products/materials have not been derived from animal origin.
- Independent third party verification and certification process supported by DNA testing.
- Development of chemical management systems for vegan materials which goes beyond the absence of animal-derived material such as leather, feathers and fur.
- Support for brands and retailers to endorse products as 'animal-free' and 'vegan friendly'.
- Training and awareness for manufacturers, brands and retailers.
- Use of the Vegan Verification Mark and The Vegan Society Trademark.

Next Steps: Start Your Journey to Responsible Chemical Management

If your business is looking to develop chemical management systems, you can discuss your needs with one of our technical experts today.

Our team has a wide range of experience in chemical risk management in the materials supply chain for the footwear and apparel sectors. Their specialist knowledge includes conducting chemical management audits and risk assessments, reviewing chemical handling procedures, raw material processing (leather, textiles, and synthetics), chemical testing, MRSL testing of formulations, RSL testing and chemical compliance.
